11 SKIN SECRETS

Your ANTIAGING GUIDE: new high-tech products that really work

1 BRIGHTEN YOUR EYES

It's no secret that eyes are the first place wrinkles make an appearance. Dermatologists agree you're never too young to start preventing and treating the problem. Clé de Peau Beauté Intensive Eye Contour Cream (\$250) combats lines and dark circles. Over 40? Replace heavy creams with lightweight gels to avoid water retention and puffiness. Try SkinCeuticals AOX + Eye Gel (\$85). ▶

ERASE DAMAGE

Check out LaseResults, a breakthrough skin-care line developed by Philadelphia dermatologist Eric Bernstein that's inspired by the benefits you get from laser surgery: tighter skin, smaller-looking pores, and fewer fine lines and wrinkles. Formulated with star ingredients like resveratrol, citric acid, and glutathione, the products promise improvements starting in two weeks. A must: the nighttime power duo.
